New products from Montana Colors. July 09

Mega 600ml, Silver Chrome.

Faster, thicker, brighter!

Montana Colors presents the new updated Mega 600 Silver Chrome, one of the most appreciated products for its speed and size.

To take the maximum advantage from these topics, we developed a new formula with a faster dry and an even better coverage, keeping the same worldwide appreciated brightness.

The new hi quality pigment, together with a special advanced solvent make even easier the combination between the **New Mega Silver Chrome** and the "Silver Killer" products.

The New Mega is already available at Montana Colors distribution.
